Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers

Vehicle Facts: For 2014, Honda Civic coupes get restyled front and rear ends, and all Civics get
 upgraded interiors * All Honda Civic models except the natural gas and hybrid versions get slightly
 more powerful engines, and the previous automatic transmission has been replaced by a
 continuously variable transmission * Honda Civic LX coupes and the Si trims gain firmer
 suspension tuning for 2014 * For 2014, Honda Civic gets a revised 1.8-liter four-cylinder engine
 and a new, more efficient CVT that replaces the five-speed automatic transmission in most models
 * Upscale available features offered included a keyless ignition, a 7-inch touchscreen interface with
 enhanced smartphone integration and a blind-spot camera display * Honda Civic is a compact car
 offered in coupe and sedan body styles * The standard Civic coupe and sedan come in LX, EX and
 EX-L and EX-L Navi trim variants * Honda Civic sedan is also available in a fuel-efficient HF trim
 and a natural gas variant * Honda Civic is powered by a 1.8-liter SOHC 16-valve I-4 engine rated
 at 143 HP at 6500 RPM with a torque rating of 129 lb.-ft. at 4300 RPM * A 5-speed manual
 transmission is standard on most models, with a CVT automatic transmission optional on most,
 standard on EX and EX-L * * REASONS TO BUY: The available ECON button automatically
 adjusts vehicle functions to maximize fuel efficiency; the same button releases the vehicle from
 ECON mode for enhanced performance * The rearview camera helps drivers obtain clearer
 information about what's behind the vehicle for safer reverse operations * Available Eco Assist
 indicator bars on either side of the digital speedometer help drivers know they are operating in a
 maximum efficiency mode * The single overhead camshaft, aluminum-alloy i-VTEC 4-cylinder
 engine uses state-of-the-art engineering technology to produce an impressive 140 hp (SAE net),
 yet it still receives excellent fuel efficiency * The available electronically controlled 5-speed
 automatic transmission offers refined gear ratios for quick acceleration and enhanced fuel
 efficiency, while providing more power, smoother upshifts and downshifts and quieter operation *
 The Drive-by-Wire throttle system helps enhance the driving character of the Civic; using smart
 electronics to connect the throttle pedal to the throttle butterfly valve in the intake manifold, the
 engine response can be optimized to suit the driving conditions and to better match the driver's
 expectations * Civic's Advanced Compatibility Engineering (ACE) II body structure is a
 Honda-exclusive body design that enhances occupant protection and crash compatibility in frontal
 collisions * The anti-lock braking (ABS) system uses a special modulator to pulse the brakes to
 help prevent wheel lockup; this helps the driver retain steering control when braking hard * The
 Electronic Brake Distribution (EBD) system balances the braking forces at each wheel according to
 how the car is dynamically loaded *
